6-8 Pottinger St, Central, Hong Kong |  james.wang.dev712@gmail.com |  [Website](#)

SUMMARY

Full Stack Engineer with 8+ years of experience delivering high-performance SaaS, blockchain, and DevOps solutions. Known for a fast, reliable work style, full-time availability, and quick communication that keeps projects moving seamlessly from idea to launch.

SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, PHP, Solidity, Rust, Svelte

Frameworks/Libraries: React, Next.js, Vue, Nuxt.js, Node.js, Express.js, NestJS, Fastify, Strapi, Stripe, Laravel, Web3.js, Ethers.js, Hardhat, Truffle, Thirdweb, Ember.js, Backbone.js, Preact, Mithril.js, Solid.js

SQL/NoSQL DB: MySQL, SQLite, MongoDB, DynamoDB, Cassandra, MongoDB Atlas, Sequelize, TypeORM, Prisma, Firestore, Firebase Realtime Database, Realm, Supabase, The Graph (Subgraph Development)

DevOps and Hosting Platforms: Vercel, Netlify, AWS, GCP, Azure, DigitalOcean App Platform, Render, IPFS, Pinata, Alchemy, Infura, Moralis

UI Components/Styling: Tailwind CSS, Shadcn, AntD, MUI, styled-components, Bootstrap, Foundation, Semantic UI, Chakra UI

State Management & APIs: Redux, Redux Toolkit, Redux Saga, Context API, MobX, Jotai, Vuex, Pinia, GraphQL, Apollo Client

Performance Optimization: Lazy Loading, Code Splitting, SSR, CSR, Webpack, Rollup, Parcel, Browserify

Version Control & CI/CD: Git, GitHub, GitLab, Docker, Travis CI, Circle CI, Jenkins, GitLab CI/CD, Bamboo

Collaboration Tools: Jira, Trello, Slack, ClickUp, Asana

Testing Frameworks: Jest, Cypress, Mocha/Chai, Jasmine, Puppeteer

Design Tools: Figma, Adobe XD

WORK EXPERIENCE

Full Stack Engineer | [Evolphin Software](#) | CA, United States | Remote

October 2022 – November 2024

- Contributed to **Crop Photo AI** platform—a scalable, AI-powered **DAM/MAM** system enabling seamless version control, collaboration, and creative workflows across images, video, and metadata-rich assets.
- Integrated **REST APIs** for dynamic data handling, improving system responsiveness.
- Spearheaded the adoption of **server-side rendering (SSR)** strategies in **Next.js** projects, leading to a 60% increase in page load speed and improved **SEO** rankings.
- Designed **mobile-first**, responsive UI components to enhance accessibility across devices—leading to a noticeable uptick in engagement.
- Developed **custom hooks in React** to simplify **state management** and improve code reusability across different modules.
- Collaborated on **WebAssembly** integration to accelerate complex image and video processing workflows.
- Enhanced web accessibility by implementing **WCAG 2.1** guidelines, making the platform more inclusive.
- Automated **CI/CD** pipelines with **GitHub Actions**, reducing deployment times by 30% and improving release reliability.
- Led the migration from **JavaScript** to **TypeScript** to improve code maintainability and reduce bugs.
- Worked closely with UX/UI designers and backend engineers in an **Agile** environment to deliver features on schedule.
- Conducted interactive workshops on advanced **React patterns**, fostering skill growth among team members.

Projects

[Crop Photo](#) – AI Bulk Image Editing SaaS platform | Tech Stack: React, Next.js, FabricJS, TypeScript, HTML5 Canvas

- Built an AI-powered bulk image editing platform that automates **cropping, resizing, background removal**, and **image retouching** at scale.

- Integrated advanced AI tools including **Smart Resizer**, **Headless Face Cropper**, **Background Remover**, **Custom Cropper**, **Lifestyle Cropper**, and **Listing Analyzer** to handle diverse image types and streamline workflows.
- Faced challenges around delivering high-quality output across modes like fashion, e-commerce, and headshots; overcame these with content-aware AI cropping and layout automation, drastically cutting manual effort.
- Optimized **server-side rendering (SSR)** and lazy loading, reducing load times by 40% and enhancing **SEO**.
- Enabled powerful batch processing: users can upload hundreds of images and receive processed outputs—cropped, resized, cleaned—in seconds rather than hours.
- **Impact:**
 - Automated high-fidelity image processing, driving massive time savings.
 - Ensured consistent, high-quality visuals across product images, headshots, and lifestyle shots.
 - Delivered scalable, brand-compliant visual workflows that empowered marketing and creative teams.

Full Stack Developer | [Self-Employed](#) | Remote | Freelancing

May 2020 – August 2022

- Delivered full-stack solutions for multiple **SaaS platforms**, leveraging modern web technologies to build scalable, user-friendly applications.
- Developed [Supermind.bot](#) — an AI-powered chatbot platform designed to enhance customer interactions through intelligent automation.
- Built [The Captapp](#) — a comprehensive platform streamlining digital content capture and management for businesses and individual users.
- Created [QRCode AI](#) — an innovative SaaS tool for generating and managing dynamic QR codes integrated with AI-driven analytics.
- **Developed decentralized finance (DeFi)** apps on **Ethereum** using **Solidity** smart contracts, integrating **Chainlink** Oracles for reliable data feeds; used Hardhat for testing and deployment.
- Led cross-chain interoperability solutions using **Polkadot's** Substrate framework to enable seamless asset transfers between blockchains.
- Built **NFT** marketplaces on **Solana** with **Rust** and **Anchor**, optimizing transactions and integrating **WalletConnect** for wallet interoperability.
- Architected supply chain solutions on **Hyperledger** Fabric focused on traceability and transparency for all stakeholders.
- Collaborated on **DAO** governance implementations on **Arbitrum** Layer 2 with **OpenZeppelin** Contracts for cost-effective, secure voting mechanisms.

Web Developer | [Crawford House](#) | Hong Kong

July 2017 – March 2020

- Integrated **REST APIs** for dynamic data handling, improving system responsiveness.
- Revamped the front-end architecture, **migrating from JavaScript to TypeScript** to improve maintainability.
- Led internal training sessions for **junior developers**, increasing overall team efficiency.
- Innovated the implementation of dark mode using **CSS** variables and **React context**, enhancing user experience for nighttime browsing.
- Collaborated on a cross-functional team to integrate **WebAssembly** modules, significantly boosting performance for complex calculations.
- Architected a reusable component library with **Storybook**, streamlining UI development and ensuring design consistency across projects.

EDUCATION

City University Of Hong Kong | Hong Kong | BSC Computer Science

2010 - 2014
